

The Trolley™ E Monitor Lift

The Trolley™ family of innovative flat panel monitor lifts offers a flexible, secure, and space-saving solution for any computer environment — from the classroom/training room to the corporate office.

The Trolley™ E provides a no-hassle way of hiding the flat panel display when not in use and making it emerge from beneath the desktop when needed.

The Trolley™ E provides push button activation and an automatic, retractable access door. This model accommodates most 20" wide screen or 21" diagonal flat panel displays.

The Trolley™ E features *Intelligent Motion Technology™*. This innovation protects the unit from accidental damage or vandalism by constant monitoring of The Trolley's current operational status.

See next page for more details.

Note: 100V ac - 240V ac 50/60Hz SEC: 12V dc Motor, Universal Power Supply, U.S. plug (adapter required in some countries)

Basic Operation

The Trolley™ E

- 1 Conveniently located push buttons allow the monitor to raise and lower with ease.
- 2 Fully closing access door provides protection of the mechanics (in raised position) and monitor (in lowered position) as well as provides a sleek look to any work surface

The Trolley™ EXL Monitor Lift

From the classroom to the corporate office, The Trolley™ family of innovative flat panel monitor lifts offers a flexible, secure, and space-saving solution for any computer environment. With the press of a button, the display emerges from its fully recessed compartment beneath the work surface while the patented access door provides a clean, uncluttered work space.

Push button activation with an automatic, retractable door provides a hassle-free way of hiding the flat panel display when not in use and making it emerge from beneath the desktop when needed.

Intelligent Motion Technology™ protects the unit from accidental damage or vandalism through constant monitoring of the Trolley's current operational status.

Compatible with  **NOVA Linked™** - A networking system that allows instructors to have complete control of NOVA's Trolley monitor lifts. (Ask your sales representative or visit www.novadesk.com for more information)

The Trolley EXL accommodates most 24" widescreens.

Note: The Trolley™ EXL uses 110-240 Volts, 50-60 Hz, Universal Power Supply, U.S. Plug (adapter required in some countries)

The Trolley™ EXL Basic Operation

- 1 Conveniently located push buttons allow the monitor to raise and lower with ease.
- 2 Fully closing access door provides protection of the mechanics (in raised position) and monitor (in lowered position) as well as provides a sleek look to any work surface
